

A Community-Developed List of Software Weakness Types

[Home](#)[About](#)[CWE List](#)[Scoring
Search](#)[Community](#)[News](#)

CWE™ is a community-developed list of common software security weaknesses. It serves as a common language, a measuring stick for software security tools, and as a baseline for weakness identification, mitigation, and prevention efforts.

Search CWE

Easily find a specific software weakness by performing a search of the CWE List by keywords(s) or by CWE-ID Number. To search by multiple keywords, separate each by a space.

See the full [CWE List](#) page for enhanced information, downloads, and more.
