

CS 4501/6501: In-class 3

Model for Testing

31-Aug-2017

Names:

Purpose: Hands-on experience with JUnit

Instruction: Work with your neighbors in groups. Consider [ArrayOperations.java](#). Develop 3 JUnit tests to evaluate `ArrayOperations.numZero()`. You should add your JUnit tests to [ArrayOperationsNumZeroTreset.java](#)

Submission

Submit your JUnit tests to Collab. Each group submit only **one** copy. Be sure to include all names.
